Zoning/Conservation Department

Watercraft Decontamination Ordinance- Zoning Administrator Jay Kozlowski presents to Committee the idea of a County wide ordinance requiring boaters to clean their boats before and after they visit any lake in the County in an effort to stop the spread of invasive species from lake to lake. This idea of an Ordinance was brought to the zoning and conservation department by the Whitefish lake association and the town of sand lake. Kozlowski explains to the Committee that he does believe this is would be a positive thing to do, however at this point it is in the early stages and there would need to be much more interest from other townships and lake associations before it would become a County level ordinance. He also states that is would be a very difficult task to get all of the lakes on board. Kozlowski points out that individual townships can create their own ordinances to enact watercraft decontamination ordinances for their lakes. Kozlowski concludes with saying that the idea of creating this County Wide ordinance will be brought back to the committee at a later date if interest from other townships increases. The County Forest Administrator will take the lead at the committee’s request. During development of the plan public participation should be utilized to provide for public participation throughout the planning process. Public participation and inputs into the plan should consider s. 28.11, Wis. Stats., which governs the County Forest program and provides the sideboards to which this plan must adhere.
Sawyer County’s public participation process includes the following:

Sawyer County Forestry Department will prepare the initial draft chapters with the assistance of a citizen advisory committee where appropriate. Individual draft will be presented to the Land, Water, and Forest Resources committee for review. After approval of the draft by the committee the chapters will be posted on the Sawyer County website for a 30 day review period. Interested citizens may submit comments to the Sawyer County Forestry Department via e-mail, US mail, phone call or in person throughout the development of the plan.

Sawyer County’s Commitment to Sustainable Forestry

Our county forests provide a vital contribution to the State and the world by providing economic, environmental and social benefits important to our quality of life. Sawyer County believes that accomplishing such sustainable forestry requires a commitment and partnership from all the groups and individuals that benefit from these public lands.

Sawyer County’s Commitment

In the management of the Forest that will include the sustainable harvest of forest products, the protection of special sites, wildlife, plants, water quality and aesthetics.

All forestland owners have a responsibility to provide sound forest stewardship. Sawyer County will work in cooperation with the Department of Natural Resources (DNR) and other natural resources groups / agencies in providing sustainable forestry information to those landowners and individuals impacting forest sustainability in Wisconsin. We will support research efforts to improve the health, productivity, and management of forestlands both internally and through cooperative efforts. In managing the Sawyer County Forest, a spectrum of forestry practices will be employed to achieve our sustainable forestry objective. Both intensive and more extensive forest management techniques will be used to provide for wildlife, forest products, recreation, aesthetics, water quality, aesthetics and ecosystem maintenance. In keeping with this responsibility Sawyer County is committed to FSC and SFI Certification.

125 HISTORY

125.1 STATEWIDE HISTORY AND DEVELOPMENT

In 1927, the State Legislature passed the Forest Crop Law, authorizing counties to create county forests. An opinion of the Attorney General with reference to the Forest Crop Law stated that the counties would be exempt from the owner's share of annual tax. In 1929 the law was amended to create the County Forest Reserve Law. In 1963, several major revisions were made, creating the County Forest Law s28.11. The most notable change was the creation of a permanent program of forests that would be managed in accordance with a 10 Year Comprehensive Land Use Plan developed by the county, with the assistance of the Department of Natural Resources. Several grants and loans were created and remain available to counties to compensate for public uses of these county forest lands as stipulated in s28.11. To fulfill additional statutory obligations acreage share payments to towns are currently $.30/acre, and towns with county forest land receive a minimum of 10% of the stumpage revenue from their respective County Forest each year.

In 2020, twenty-nine counties in Wisconsin owned approximately 2.4 million acres entered under the County Forest Law.
1932: A County resolution was adopted designating the County Forest reserve Units. The units established were the Namekagon, Totogatic, Lake Chetac North, Lake Chetac South and the Thornapple Forest Reserve Units. At the time, the County Conservation Committee was placed in charge of the administration of these lands. They were also authorized to select some individuals to supervise activities on the Forest. The first Administrator was given title of County Trespass Officer. He was to be responsible to the Conservation Committee and to work in cooperation with the Wisconsin Conservation Department.

March 18, 1933: The first application was made by Sawyer County to enter non-agricultural County lands under the State Forest Crop Law and the County Forest Reserve Law. These lands were to be designated by the Conservation Committee, Agricultural Committee and Tax Deed Lands Committee.

1932-1941: An important development in the history of the Sawyer County Forest was the establishment of the Smith Lake Civilian Conservation Corps (CCC) Camp, located in Section 8, Township 42 North, Range 7 West. This camp was started in 1932 and closed down in 1941. The Federal CCC program employed young men who worked hard planting trees and improving the Forest and Forest infrastructure. Among the accomplishments on the Sawyer County Forest were 4,688 acres of trees planted and 4,237 acres of timber stand improvements. Other projects included white pine blister rust control, construction of fire towers, telephone lines, fire lands and firebreaks.

1933: The total acreage of Sawyer County land entered under the Forest Crop Law was 37,622 acres.

1934: The first County Forest ordinance was adopted.

1937: The first recorded County Forest withdrawals occurred.

1939: Portions of Section 21, Township 42 North, Range 8 West were withdrawn for
purposes of exchanging land to obtain flowage rights on the Totogatic Flowage. Also, in 1939, upon recommendation of the State and resolution of the County Board, County lands within the boundaries of the Flambeau River State Forest were traded for State lands within the boundaries of the Sawyer County Forest. At this time, the Sawyer County Forest was in excess of 70,000 acres.

1941: Starting about this time, lands that could be purchased for a reasonable price within the County Forest boundaries were acquired. Among the lands acquired was the Hans Thompson property in Section 7, Township 42 North, Range 7 West. These purchased lands, together with lands acquired through tax delinquency were entered under the Forest Crop Law.

1947: A resolution was adopted that all fire lanes in Sawyer County maintained by the State be turned over to Sawyer County to be maintained and operated under the direction and supervision of the Sawyer County Conservation Committee. Later, many of these roads were turned over to the individual Townships to be entered under the Town Road Systems.

1964: The total acreage of the Sawyer County Forest was 113,079 acres.

1960’s: First snowmobile trail was developed.

1973: Johnson Timber chipping mill opens just outside hayward, increasing demand for nearly unmarketable aspen timber.

1976: The County receives a Federal grant to develop a skiing and hiking trail. The trail eventually becomes known as the American Birkebeiner Trail.

1979: Louisiana-Pacific wafer board plant constructed, greatly increasing demand for aspen timber resource.

1979: American Birkebeiner Trail widened to present width.

1988: First funded ATV trails developed.
1993: First Chequamegon Area Mountain Bike Association (CAMBA) trail developed.

1993: County Forest gross timber sale revenue reaches $255,586

2001: County Forest gross timber sale revenue exceeds $1,000,000 for the first time with gross timber sale receipts of $1,072,162.

2005: County Forest gross timber sale revenue exceeds $2,000,000 for the first time with gross timber sale receipts of $2,094,267.

2008: Sawyer County completes land purchase of 1398 acres from Board of Commissioners of Public Lands, parcels located within the Edgewater and Totogatic Blocks of County Forest bring total acreage of sawyer County Forest to 115,197 acres.

2015: County Forest gross timber sale revenue exceeds $3,000,000 with gross timber sale receipts of $3,247,738.

125.3 WISCONSIN COUNTY FORESTS ASSOCIATION

Sawyer County is a member of the Wisconsin County Forests Association, Inc. (WCFA). This Association was incorporated on May 15, 1968 under Chapter 181 of the Wisconsin Statutes, without stock and not for profit. The WCFA Board of Directors is composed of fifteen delegates elected from County Forestry Committees who are members of the Association and two members at large.

WCFA provides a forum for consideration of issues and policy that are common to all of the county committees responsible for their respective County Forest programs, including those programs encompassed under s. 28.11 and chapter 77, Wis. Stats. WCFA also provides leadership and counsel to County Forest administrators and forestry committees through regular meetings and active committees on legislative and recreational issues. WCFA develops and implements a strategic plan. The organization’s mission statement is as
Wisconsin County Forests Association provides leadership uniting the interests of the world’s largest county forest program while ensuring long term forest health and sustainability.

125.4 TRENDS
The values and uses of the Sawyer County Forest contribute significantly to fulfilling many of society's ecological and socioeconomic needs now and in the future. Changing trends will impact the values and uses of the Forest in coming years.

- Wisconsin’s forests are naturally changing due to forest succession. Most of the County Forest acreage statewide is a result of regeneration or planting from the early to mid-1900's. Mid to late successional northern hardwood forests are replacing the early successional aspen-birch, oak and jack pine forests of the 1940’s through the 1970’s. The aspen cover type is key habitat for many of the state’s premier game species including deer, ruffed grouse, snowshoe hare and woodcock. The county forest system currently has 15% of the State’s public land base and 24% of the aspen resource.

- Conflict over timber management practices will likely continue to increase as more individuals and groups demand greater involvement in forestry decisions. Practices such as clearcutting and even-aged management will continue to be controversial. Efforts to educate the public on the merits of these sound forest management techniques will continue.

- Sawyer County may experience funding problems as municipalities are being required to provide more services with less money. Potential losses of revenue from decreased shared revenues and resistance to tax increases may make county timber revenues increasingly important to the finances of county governments. This is complicated by increasing public pressure to reduce timber harvests on county forests.

- Increasing knowledge about a wider variety of species and their habitat needs is leading to a growing list of threatened and endangered species. This could lead to improvements in managing the forest and mitigating impacts to these species. Mitigating measures have the potential to impede recreational and forest management
activities. Refer to Chapter 800 (840) for specifics on this subject.

- Invasive exotic species pose an ever-increasing threat to the County Forest. Gypsy moth, Asian long-horned beetle, garlic mustard, buckthorn, honeysuckle have all gained a foothold in Wisconsin’s forests. Refer to Chapter 600 (610) for specifics on this subject.

- The Forest is considered to be an outdoor classroom serving all age groups. It consists of diverse communities with a large variety of plant and animal life giving ample opportunity for study and observation.

125.5 PROTECTING THE PUBLIC RESOURCE

As stated in State Statute 28.11 (1), the county forest program enables and encourages “the planned development and management of the county forests for optimum production of forest products together with recreational opportunities, wildlife, watershed protection and stabilization of stream flow, giving full recognition to the concept of multiple-use to assure maximum public benefits to protect the public rights, interests and investments in such lands; and to compensate the counties for the public uses, benefits and privileges these lands provide; all in a manner which will provide a reasonable revenue to the towns in which such lands lie.”
